## Design Comp V2

### Old (V1): Carnival Horse Racing

### New (V2): Capybara Racing

### Changes Made:

I was previously torn between two game ideas: Carnival Horse Racing and the Cute-Off Fighting Game with cute animals. After much deliberation, I thought the carnival racing would be a more fun concept to work with. However, I still wanted to add cute animals. So I rebranded the game into a capybara race where they are swimming through hot springs to reach the large tangerine. Capybaras and tangerines go hand-in-hand so I thought it would make for a more fun experience. It is also much more my style so I am excited to work on this further.
