Every Picture Project: Topic Ideation

TOPIC 1: Childhood Stuffed Animals or Plush Keychains

- I am a really big fan of stuffed animals. I have a large collection split between my Davis apartment and home. Most of my stuffed animals have a special meaning to me, but I have a few that mean a lot more to me, as they came from my childhood. Some I associate with fond memories and others I associate with people I'm close with. I'm not sure how I'd want to style this yet.
- Conversely, this can also be for my plush keychain collection. Besides full stuffed animals, I also collect mini ones. Oftentimes whenever I go to different locations, I buy a plush keychain as a souvenir so each of them has a different special memory or location associated with it.

TOPIC 2: Favorite Foods / Restaurants (or Recommended Places to Eat)

- I am also a big foodie. I love finding hidden gems and cheap restaurants with high quality. In this, I'd likely take pictures of my favorite dishes, associated memories, and maybe ratings + price? This could be designed like a menu.

TOPIC 3: Dog / Nephew Timeline

- Although pets and family members may be more generic, they are also a big part of my life. I initially wanted to create a timeline of my dog's life, as he's one of the most special things in the world to me. I raised him as a puppy and it could be nice to explore his life. He's already 7 so it might be a nice project to have as he gets older.
- With my nephew, he isn't even a year old yet, but it could be fun to explore how much he's grown since then. I remember when he was born and he's suddenly already 9 months old! Time flies by.
